Automation of paying

The automatic pay machines KAS102/103 enables parallel processing of coins and banknotes, as well as the output of coins and receipts or tickets; this all with minimum space required. With their concept matching the corresponding application, they are the optimal solution for processing small amounts of money. This compact machine type is used as e.g. pay terminal for tariffs and fees or as reloading station for chip cards. And it provides these services day by day, 7 days per week, 24 hours per day.

- **7" TFT colour display**
For simple interactive user navigation.
- **Simple filling and cashing from the front**
- **High payout security**
High degree of security in the validation, processing and payout of coins and banknotes thanks to our proven system components.
- **Coin hopper**
for the payout of coins or metal tokens

Optional

- **Thermal printer with cutter**
- **Stand (made of stainless steel)**
for installation of the machine at an ergonomical height
- **Floating output**
to trigger a turnstile for example

Hard- and software

- **Internal PC control**
based on Linux. An uninterruptible power supply ensures a backup during a power failure.
- **Web browser technology**
Thus software settings from anywhere in the world are possible.
- **Various setting options via the web interface:**
Calling up statistics, viewing log data, resetting faults, cashing, sending emails and more.
- **Network technology**
Wireless connection is possible via WiFi and UMTS (optional).
