Customer-specified solutions

Front panel can be bespoke with your logo / design
with high quality UV direct printing.

Application

The KAS 450 EASY PAY cash machine is distinguished by its clear and compact design.

The robust housing with 6 point locking and double locking system enables optimum protection and security – For both 3 mm sheet steel or stainless steel models.

Professionalism and efficiency have been the top priorities in developing the new KAS 450.

The KAS 450 impresses with its high level of flexibility with bespoke customer specification using proven components.

The KAS 450 can be used as a payment and sales system in multiple retail applications for example butchers, bakeries, confectioners, etc.

The payment process:

The customer places their order, this can be single or multiple items. Via a staff operated terminal, a receipt is issued showing the bar code, date and time, scale / sale number, and a customer number is issued. The bar code is scanned using the bar code scanner on the machine. The customer is shown the amount to be paid on the 15" display. Payment can be made with banknotes and coins or by bank cards.

Coins are deposited quickly and easily in a coin chute. If the customer has overpaid, the machine issues change.

After payment is complete, the machine prints a receipt (with the company address of the customer, sequential receipt number, date, time, amount incl. VAT and bar code number), which is submitted to a member of staff.

The goods are then handed to the customer.

Operation / Performance

- Modular hardware concept allows customers to configure all pay in and pay out components according to their requirements.
- All cash components are clearly arranged below a height of 1.40 m (specification in accordance with DIN 24972).
- Interactive user guidance via 15" touch screen colour display (Colour display positioned behind safety glass).
- Coins, banknotes and receipts are issued in an illuminated and easily accessible dispensing tray.
- Quick and easy cash replenishment / withdrawal from the front of the system.
- Can be audited via cash in transit companies (dual control principle).
